- Authentication & Authorization (JWT, session, role-based access (RBAC))
- SDLC
- Clean Code & Code Refactoring
- UI Wireframing & Prototyping (Figma, Adobe XD)
- Team Collaboration (Slack)
- Task & Issue Tracking (Jira, Trello)
- Agile / Scrum Workflow
- Attention to Detail
- Problem Solving
- Learning Agility
- State Management (Redux, Zustand, Vuex, Pinia)

Experience

Frontend Developer 2022 - 2024

PT. Lentera Sinyal Nusantara (Full Time - Contract)

Tech Stack : Vue JS 3, Typescript, Vite, Vuetify

- Developed and maintained scalable web applications
- Implemented responsive and accessible user interfaces ensuring consistency with design systems and UX guidelines
- Translated UI/UX designs and product requirements into clean, reusable, and well-structured frontend components.
- Integrated frontend applications with RESTful APIs, handling data fetching, state management, and error handling effectively
- Collaborated closely with backend developers, designers, and product managers to deliver features aligned with business requirements
- Applied best practices in component architecture, code organization, and separation of concerns to improve long-term maintainability
- Participated in code reviews, providing constructive feedback and ensuring code quality and consistency across the team
- Managed application state and side effects using appropriate state management patterns and tools

Frontend Developer 2021

CV. Lumintu Logic (Internship)

Tech Stack : JavaScript PHP, Bootstrap, JQuery

- Built and enhanced web pages using JavaScript and jQuery to support interactive features and dynamic content updates
- Worked alongside backend engineers to connect frontend views with PHP-based logic, including form processing and data submission flows
- Created responsive page layouts using Bootstrap, ensuring consistent appearance across desktop and mobile devices
- Implemented client-side validations and user feedback mechanisms to improve form usability and data accuracy
- Consumed data from server-side endpoints and handled asynchronous requests to update UI without full page reloads
- Assisted in maintaining and improving existing web modules by refactoring frontend code and resolving UI-related bugs.
- Collaborated with designers and product stakeholders to adjust interfaces based on usability feedback and business needs.
